Accessibility at Summit 2012 and Chicago

Date: 10 April 2012

We here at STC Chicago realize accessibility is an important topic for many attendees, and due to several requests, we've put together a few resources that can make your visit to Summit 2012 and the greater Chicago area successful.

Hyatt Regency O'Hare

The STC national office created an [Accessibility page](#) on the Summit website. There you can find accessibility information about the Hyatt Regency as well as the two major Chicago airports, wheelchair and scooter services, and instructions if you have dietary restrictions.

Chicago Transit Authority (CTA)

If you plan to get out and about during your stay in Rosemont, consider using Chicago's public transportation system. [A wheelchair-accessible EL stop](#) is very near the Summit hotel, and all the Chicago city buses are accessible. For complete information on CTA accessibility, visit the [CTA Accessibility website](#).

Chicago Hotspots

A visit to Chicagoland wouldn't be complete without [sinking your teeth into a slice of Chicago deep dish pizza](#) or taking in a [Monet at the Art Institute](#). If you plan to visit a local restaurant, museum, or tourist attraction, consider looking up its accessibility on one of the following sites:

- <http://easyaccesschicago.org/>—provides a directory of accessible restaurants, hotels, and transportation sources.
- www.explorechicago.org/city/en.html—provides accessibility information for nearly every attraction and destination listed on the site. You can perform a search on accessibility.

If you have additional questions about accessibility at the Summit or around the greater Chicago area, please let us know. We want your experience in our city to be positive and as easy as possible. Leave a comment or contact us at stc2012@stc-chicago.org.

[Adam Evans](#) is a member of the STC Chicago 2012 Host Committee and a technical writer at kCura.
